

Case Study

Medical & Pharmaceutical Units-BioCity

Location: Nottingham

Project: Medical, Chemistry and Pharmaceutical facilities

Project Length: 14 weeks

Classifications: Cleanroom - ISO 5, ISO 7 & ISO 8

Information:

Biocity provide clinical trial laboratories and small scale manufacturing facilities for biopharmaceutical products for human use.

The project provided another 3,000m² of laboratory and cleanroom space for business expansion, focused on medical, chemistry and pharmaceuticals industries.

Building Projects (UK) Ltd stripped out the existing offices and mechanical services back to the structural shell, to form a clear area.

Working with our clients design, we built and installed partitioning, plenum chambers, ceilings, fire protection, pass through hatches, interlocks, and other specialised works including a aseptic filling suite to ISO Class 5, ISO Class 7 Solution preparation area and a terminal sterilisation bay to ISO Class 8.

The project was completed ahead of program and within budget.
