

Case Study

Laboratories & Offices- Fluorochem

Location: Unit 14, Graphite Business Park, Glossop

Project: Construction of laboratories, offices and warehouse

Project Length: 16 weeks (1st Phase)

Information:

Building Projects (UK) Ltd were appointed as principal contractor to develop a vacant industrial unit into working laboratories, offices and distribution facilities for Fluorochem, one of the UK's foremost chemical catalogue companies.

We worked closely with the Client from the outset to accommodate many revisions to the original scheme. Due to the structural nature of the project constant communication with the structural engineer was necessary to ensure the changes would maintain the building's integrity.

Works included:

- Construction of a structural shell and high level dividing fire walls
- Full Internal fit out
- Design and construction of HVAC system
- Laboratory benching
- Air Conditioning and ventilation
- Fume cupboards
- Toilet Blocks
