

Case Study

Refurbishment -Stewart Assessment Ward

Location: Peasley Cross Hospital, St Helens

Project: The Refurbishment & Remodeling Of Welfare Facilities

Project Length: 6 Weeks

Information:

The refurbishment and remodelling of welfare facilities within a NHS Trust Healthcare Unit while maintaining the medical administrative and support functions at all times

Works included:

- Converted existing bathrooms into shower rooms with integral shower trays to form wet rooms
- New stainless steel kitchens
- Re-modelling of assisted bathrooms to form disabled access toilets
- Refurbishment of offices
- HVAC alterations

The work was carried out by our own operatives to a very exacting standard. We completed the project within a 6 week schedule mainly due to the effective project management of the programme to accommodate the care centre's changing demands due to patient care. We received accolades from both the healthcare staff and estates management who were delighted with the finished suites
